PROFILE	Software Engineering graduate currently pursuing an MSc in Project Management at La Salle Campus Barcelona. I have gained hands-on experience across data-driven systems, backend web development, and BIM/GIS automation. During my internships at Semafor Technology and Orsa Yazılım, I worked on Python-based data analysis, machine learning applications, and ASP.NET MVC web systems with SQL integration. Currently, I contribute to BIM automation projects focused on regulatory compliance and IFC model generation, integrating cadastral data, zoning rules, and backend orchestration systems. I combine strong technical foundations with structured project management principles to deliver scalable and efficient software solutions.	
EMPLOYMENT HISTORY		
Aug 2024 — Sept 2024	Software Engineering Intern, Semafor Technology & Software Consulting	İzmir
	Developed and automated Python scripts for data cleaning and Excel workflow optimization. Applied machine learning techniques for analyzing energy-related datasets. Utilized pandas, NumPy, and scikit-learn for preprocessing and model experimentation. Collaborated with engineers on debugging, optimization, and reporting tasks to improve data integrity. Technologies: Python, pandas, NumPy, scikit-learn, Excel Automation	
Aug 2022 — Sept 2022	Software Engineering Intern, Orsa Software	İstanbul
	Designed and implemented CRUD operations in ASP.NET MVC using SQL for data storage and retrieval. Developed server-side logic in C# within the ASP.NET MVC framework. Participated in backend integration, testing processes, and UI improvements. Contributed to improving UI/UX flow and enhancing overall system performance. Technologies: C#, ASP.NET MVC, SQL Server, HTML, CSS, JavaScript, Bootstrap	
Dec 2025 — Present	BIM Automation Intern, La Salle Campus Barcelona	Barcelona
	Project: Extension of the IDS Standard for Automated Compliance Checking in BIM Models Developed an automated BIM/GIS pipeline for generating regulation-compliant building envelopes. Integrated INSPIRE Cadastre WFS services for dynamic parcel geometry retrieval. Extracted zoning constraints (ALTMAX, PROFEDIF) from POUM GML datasets. Implemented rule-based compliance logic translating urban regulations into executable code. Generated IFC4X3-compliant envelope geometries using IfcOpenShell. Architected and implemented a FastAPI backend with asynchronous job orchestration for scalable parcel processing. Technologies: Python, FastAPI, IfcOpenShell, PyProj, XML/GML, IFC4X3, GIS Automation	
EDUCATION		
2025	Master of Science in Project Management, La Salle Campus Barcelona, Spain	Barcelona
	Focus areas: Agile Methodologies, Leadership, Strategic Planning, and Technology Management	
2020 — 2025	Bachelor of Science in Software Engineering, Izmir University of Economics, Turkey	İzmir
	Coursework: Data Structures, Algorithms, Machine Learning, Software Project Management, Mobile App Development (Flutter), and Web Technologies.	
SKILLS	Python	Machine Learning
	C#	pandas
	JavaScript	NumPy
	SQL	scikit-learn
	FastAPI	PyProj
	Web Development	Git

ASP.NET MVC	Modular Pipeline Design
RESTful Services	Background Job Processing
IFC4X3 (IfcOpenShell)	Mobile Application Development
IDS concepts	Agile
GML/XML parsing	Scrum
Cadastral WFS integration	Technical Documentation
POUM zoning analysis	Problem Solving

LANGUAGES

Turkish: Native	French: A2 (Beginner)
English: C1 (Advanced)	Spanish: Elementary (A1 – Currently Improving)

HOBBIES

Calisthenics & Strength Training
Mixed Martial Arts
Yoga & Mobility
Travel & Photography
